

The Danish Equine Academy

- Because Quality Matters

The Danish Equine Academy

Educate Equine Massage Therapists

Provide Full Massage Therapy Services

It is our vision to be the best within our field.

What we do, we do best.

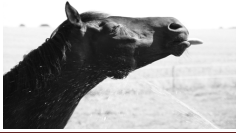

Because Quality Matters

Company profile

The Danish Equine Academy provides courses and educations at a very high academic level, so that the students are prepared with an all-round knowledge and are competent when they graduate.

MySir Equine Massage Therapy provides horse and rider/owner with massage therapy and gives them proper advice. We guide horse owner, rider and trainer in a way that prevents movement disorders before it turn into a problem. It is important that the top athlete's musculoskeletal system avoids strain and stress and that the horse and rider moves correctly.

The Danish Equine Academy

- Because Quality Matters

Our values

Everything we do has the purpose to impart our knowledge to our students and our clients so that we can help the athletes (horse and rider) towards a better cooperation, in which the apparatus of movement is in focus.

Competing horses as well as human athletes are working very hard to achieve great results. A lot of effort is put into the training, the feeding and the treatment for the horse to achieve its potential maximum.

Unfortunately, such top performances often induce several injuries, stress, pain and worn out horses.

The horse is a top athlete. Physical and psychological well-being for a top athlete is a very important factor. In the long run a stressed out nervous system can affect the muscles, the organs and the immune system.

Therapy treatments can advance the daily well-being; the massage can prevent tensed muscles, tendons, joints and nervous system.

Furthermore massage therapists can recognize tense and sore muscles - thereby preventing injuries from coming.

The Educations

The horse - the biggest athlete of them all.

We educate you - you massage them.

The purpose of The Danish Equine Academy is to offer courses/educations at a high level within areas such as the functional anatomy of the horse, biomechanics, therapy, etc.

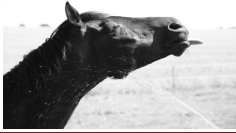

Through that the academy wishes to impart the students to an interconnected knowledge about the subjects they choose to educate themselves within.

The educations will be at a very high level so that the students are equipped with an all round knowledge when they graduate. It is possible to be educated on different levels, both as an equine therapist and as a horse therapist.

We want the worlds's biggest athlete to run faster

All of the levels will be finalized with written examinations as well as oral and practical examinations. At the exams an extern censor will be present if possible.

The Danish Equine Academy

- Because Quality Matters

Regularly through the courses there will be assignments and thesis's to be handed in. Moreover the students will have to make personal experiences in practical therapy and must through the courses massage between 125 - 200 horses.

A diploma will be handed out when each course/education has been passed.

The educations are of modular structure so that it is possible for the students to scatter out the courses over a longer period of time. Typically each module is over a period of 4 days. For the practical training and examinations one day, must be devoted on each level.

The cost of a course of one day is EUR 2.000,-. The maximum number of participants at one course is 8.

The courses at Level 1 are foundational knowledge which forms the basis of the courses on the higher levels.

To become a Certified Equine Massage Therapist on Level 1 you must have attended the following courses:

Level 1 Anatomy & Physiology	4 days
Level 1 Massage Basic	4 days
Level 1 Sports massage	4 days
Level 1 Massage Advanced	4 days
Level 1 Practical Training	2 days
Level 1 Examination	2 days

Treatment methods	4 days
Training with cavaletties	2 days
Learn to massage your own horse	2 days

MySir Equine Massage Therapy

MySir Equine Massage Therapy provides massage therapy services.

The purpose of MySir Equine Massage Therapy is to give horse and rider/owner massage therapy and give them proper advice. We guide horse owner, trainer and rider in a way that prevent movement disorders before it turns into a problem. It is important that the musculoskeletal system avoids strain and pain and that the horse and rider moves correctly.

The Danish Equine Academy

- Because Quality Matters

We are working together with chiropractors, physiotherapists, doctors and veterinarians for both human and equine.

Massage of the equine athlete can be beneficial in the following situations:

Rehabilitation: As part of the recovery program to facilitate better and faster healing through increased blood flow and to prevent compensatory lameness.

Maintenance: As a regular part of the horses exercise program to keep the muscles smooth and prevent injury.

Pre-event: As part of injury and as training prevention program by loosening and warming muscles prior to competition.

Post-event: As part of the recovery process and cooling down process by reducing stiffness and soreness in the muscles.

We want the future star to last longer and we want the adult athlete to be stronger and smoother

Each massage session produces an **examination form**, which can be used by trainer, owner or other therapists for information to further treatments and exercise programs.

The **cost** of one equine massage therapy treatment: EUR 100.00,-

Remember that massage and acupressure is **NOT** a replacement or an alternative to veterinarian treatments.

The Danish Equine Academy will be pleased to produce a proposal to you on request, including the parts of our services which you prefer or find attractive.

We are confident that our services will effectively address your needs.

The Danish Equine Academy has been educating equine massage therapists since 2003.
